

# Karma Jamtsho

## Urban Ecologist

**Karma Jamtsho (Mr)** is pursuing his PhD at Edith Cowan University in Australia, where he is focusing on the effects of increasing impervious surfaces on urban riparian zones. He has significant experience as a terrestrial plant ecologist, having worked nationally and internationally. His prior research included conducting ecological studies on alpine and temperate regions in Bhutan. In Australia, Karma is a research assistant for project - Propagation, and Monitoring of the wavy-leaved smokebush (*Conospermum undulatum*) and Keighery's Macarthuria (*Macarthuria keigheryi*) for Perth Airport. He has also contributed as a team member to the survey of peatland flora in the Walpole Wilderness Area. Additionally, Karma co-leads a project focused on seed research for the *Conospermum undulatum* population for Main Roads, WA. Throughout his career, Karma has gained experience in various government sectors, including law enforcement agencies and education. He has authored scientific publications and textbook chapters in environmental studies, demonstrating his extensive knowledge and expertise. Karma also has a keen interest in information technology and computer programs.
